- Continual improvement of HSE performance.

MD

HSE POLICY

HEALTH, SAFETY AND ENVIRONMENTAL (HSE) POLICY

SAG is committed to:

- Comply with all applicable environmental, occupational health and safety laws and regulations.
- Prevention and control of pollution and waste.
- Maintain a clean and safe work environment.
- Optimize use of resources.
- Promote awareness of relevant environment, health and safety issues among its employees, contractors, suppliers and interested parties.
- Monitor the performance of its HSE Management system and strive to continually improve the same.

MD

QUALITY RECORDS

QUALITY MANAGEMENT SYSTEM

Scope

This section describe the structure of the documented quality management system established and implemented in the company.

Quality Management System

Concept of integrated quality management system is adopted and all the documents together defines the complete system for the company. The various process involved in the operation of the company and their sequence and interaction are as defined in a flow chart and quality plan. All the process are controlled by documented procedures. Information to support the processes is provided by the management. Effectiveness of the process are evaluated based upon the information available from the quality management system and measures are taken for improvements. Necessary resources are provide to performing work affecting products (ie) education, training, process equipment, etc.

Document requirements

The quality management system is defined in four levels of documents via. Quality management system manual, quality system procedure, work instructions & quality plans and quality records.

Quality Managements System manual (Level 1)

The quality management system manual is the primary documents (level 1) of the quality system. This document contains the quality policy for the personal performing, verifying and managing the processes of the company.

Quality System procedure (Level 2)

They form the second level of the company's documented quality system. All the specific operations and inspection activities are carried out as per documented procedure.

Work Instruction & Quality Plans (Level 3)

Work instruction are used in the working area (ie) marking, cutting, fabrication, welding with the details of the process requirement, acceptance norm, safety, etc.

Quality plans to assure the quality of purchased material, in processes and finished products are implemented to assure the quality at each stage. These plans described the various inspection s to be completed before taking decision on quality of products. Quality plans are subjected to revision from time to time as the need arises be. Quality plans are to monitor, and measure the processes at each stage.

Process flow chart described about the processes starting from receiving raw materials to delivery stage.

SION ALUMINIUM & GLASS L.L.C

Fabrlication, Installation, Maintenance & All type of Metal works.

Quality Records (Level 4)

Records that from level 4 of the quality system are generated and maintained as evidence of quality system implementation. The particular records to be generated and the standard formats to be used are detailed under the relevant procedures.

Control Of Quality Records

In order to establish evidence for the implementation of quality system, records are created at different stage and maintained. These records are the evidence for systematic quality management in the operation of the company. These records are reviewed periodically to identify the weakness in the system and hence to initiate actions to prevent them.

A documented procedure is established for the identification, storage, retrieval, protection, retention time and disposition of various quality records. The retention period of records is defined based upon their Importance.

SION ALUMINIUM & GLASS L.L.C

Fabrication, Installation, Maintenance & All type of Metal works.

COMPANY OBJECTIVE

To achieve a sustained and profitable growth in the field of architectural facades and Moderate steel structures by developing and delivering quality products that consistently satisfies the needs and expectations of our clients and hence acquiring the trust of our customers and maintaining a healthy and constructive relationship with them. Our primary purpose is to provide high quality service to our customers. Since 1999, we have dedicated ourselves to excellence by serving our clients faithfully, efficiently and competently. We believe that excellent client service and professional satisfaction of our people will lead to the financial success of our firm.
